Washington, Nov. 2 .-- One of the agents for the Union Iron Works of San Francisco called on Secretary ty-rater class. Howard Gould has Herbert at the War Department today and complained of the delay in furnishing the battery for the new ship Olympia. This delay, it is claimed, is caused by failure to provide gun carriages, and it is said that some have not even been tested. The Oregon is now placed in the same predicament, because of the failure to get the armor for her, consequently it will be some lost another steady customer for my time before either the Oregon or the Olympia will be ready for ser-

A successful experiment with Allan's model was made recently in the presence of the Earl of Hopetoun and many naval and military officers. After seeing the experiments Rear Ad-Bowden Smith gave the opinion that the boat was all that Mr. Allan claimed, and was destined to revolutionize naval warfare.

SAN FRANCISCO HARBOR.

Plans for Defense to be Ready Next Year.

Washington, Nov. 6 - A pilot chart | Suva [Fiji], was issued today at the Hydrographic office of the North Pacific. Congress authorized this publication at the last session, which is intended | On or about the dates below stated, viz: to aid the mariners of the West. About the stretch between San Francisco and Yokohama, a distance of 4500 miles, every bit of information obtainable is given.

It is very interesting and in one place indicates a single floating log about 5000 miles from the Hawaiian annual report, deals largely with the progress thus made in protecting the seaboard from possible attacks of an enemy's fleet. He says that at San Francisco a battery of sixteen twelveinch mortars is very nearly ready, and by the middle of next year three twelve-inch rifles will probably be mounted on high sites overlooking San Francisco harbor.

The project for the defense of that port includes eighteen twelve-inch guns on lifts, twenty-three ten-inch and thirteen eight-inch guns on disappearing carriages, fifteen twelveinch, five ten-inch and six eight-inch guns on non-disappearing carriages, since these are on Ligh sites, which need not fear an enemy's direct fire; 144 twelve-inch mortars, together with submarine mines operated from STEAMSHII 144 twelve-inch mortars, together Per year, postpaid to United States

THE FASTEST STEAMER.

British Torpedo Boat Daring Averages Nearly Thirty-three Miles.

From the best available records just now it would appear that for war vessels of appreciable size, ranging up into thousands of tons displacement, twenty-six and a half DIAMOND HEAD, Nov. 20, 10 P.M. miles an hour, equivalent to a little over twenty-three knots, is the highest speed that has yet been attained, and belongs to the latest of the com-In nine consecutive passages the ucania has averaged 21½ knots an Philadelphia. This figure was reached with triple screws and an indicat-The barkentine S. N. Castle ed horse power equipment of about aves at noon today, bound for 21,000 for 7350 tons displacement, the dimensions of the ship being 412 feet length, 58 feet beam and 221 feet draught. Coming down to vessels of smaller size, however, the speed performance is found considerably increased, as exemplified in the new twin-screw torpedo boat destroyer Daring, built for the British navy by Thornycroft & Co. It is this boat for which the claim has been made of being the fastest from this port. The band was able run of a little over twenty-nine knots, or nearly thirty-three and onehalf miles an hour, recently made on the Thames. The mean of three runs was 28.656 knots, or about of sugar.
